Frontend: HTML, CSS, Bootstrap, TailwindCSS, Next.js, React.js, Flutter
Backend: Node.js, MySQL, MS SQL Server, PostgreSQL, MongoDB, DynamoDB, .NET Framework, ASP .NET Core
Tools:GitHub, Git, VS Code, Visual Studio 2022, Docker, NPM

PROJECTS

King William Hotel ⊙ | *Next.js, React, TypeScript, TailwindCSS,, SQL*
- Led development of a full-stack hotel management application with customer and staff-facing interfaces.
- Built a booking platform with real-time room availability, account management, and service add-ons.
- Developed a staff admin dashboard for reservation management and operational oversight.
- Implemented secure authentication and user sessions with NextAuth.
- Designed a responsive UI using TailwindCSS and Shadcn components for modern, consistent styling.
- Created a normalized PostgreSQL database schema with optimized queries for efficient data handling.

ShareSpace ⊙ | *React, TypeScript, TailwindCSS, PostGres SQL*
- Built a collaborative dashboard application to streamline coordination in shared living spaces.
- Implemented key features including task management, chore rotation, expense and billing tracking, complaints categorization, and mood check-ins.
- Designed a clean, Notion-inspired interface to enhance usability, organization, and communication among house members.

Sales Management Webb App | *PHP, SQL*
- A web app for sales management, built with PHP and PostgreSQL. It includes user authentication, client management capabilities, and client log-in.

Student Registration Management System | *C#, .NET, Windows Form*
- Developed a Windows Forms application to manage student registrations with full CRUD functionality.
- Implemented robust data validation and exception handling to ensure data integrity and reliability.
- Utilized Newtonsoft.Json for JSON serialization and deserialization of student records.
- Integrated a BindingList to provide real-time UI updates and improve user interaction with student data.

EXPERIENCE

Web Developer | *Intern*   2025
JG College, Ahmedabad

- Built and maintained responsive web pages using HTML, CSS, and JavaScript.
- Enhanced site accessibility and performance through front-end debugging.
- Updated website content and implemented department-driven changes.
- Used Git for version control and collaborated with team members on projects.
